

Printing the Binder

- All binder materials are in the “Binder Prints” folder
- The “Binder (Decoy Ducks)” Google Doc contains most of the pages, but there are various scans laying around, too.
- Please note the following when printing
 - Information sheets, like readings and instructions, work great when printed double-sided
 - Pictures for activities, coloring sheets, bingo cards, and more should be printed single-sided
 - When printing from “Binder (Decoy Ducks)” Google Doc, the computer will insert a header page between every single section. This is not very desirable or useful for this project, and the important thing is to note that it happens

Printing Activity Materials

- All activity materials that benefit from special printing are in the “Activity Prints” folder
- A4 and A5 printouts will benefit from printing on cardstock then laminating. They will also need to be cut out
- The A15 poster should ideally be printed large, but we understand that it may not always be possible
