

Hello there! In an attempt to make it easier for you to continue the work on this crate, we are creating this document as a quick guide.

Folder Structure (“/” denotes a folder, no “/” denotes a file)

2026 Decoy/ (root folder)

```
|
|--- Activity Prints/ (these are PDF that you should print when finalizing the binder. All files here
|   are for the activities in the binder, and the games should be printed on cardstock and
|   laminated. Every file is labeled with the activity it belongs to)
|
|--- Binder Prints/ (these are PDF and Google Doc files that you can print for the binder. Every
|   file is labeled with the page numbers that it should have. There are a total of 137 pages. The
|   Google Doc file is the “master” file. There are pages in it that tells you where to insert the
|   other loose pages)
|
|--- Hosted Online/ (these are activity files and videos that need to be hosted online by the
|   museum)
|   |
|   |--- Activity Files/ (activity files to be hosted online)
|   |
|   |--- Decoy Carving Videos/ (videos to be hosted online - BEWARE these are large)
|
|--- Printing Guide (tells you how to print the binder)
|
|--- Project Status (you are reading it now)
|
|--- Shopping List (a list of stuff that still needs shopping for at the end of our DukeEngage)
```

What We Did

- Created a binder with a consistent style that you can follow for this and other crates
- Created many information content and activity materials in the binder

What Is Left to You

- Proofread the whole thing (this is probably left to the Core Sound Museum staff, actually)
- Add in connections to NC education goals (*an IMPORTANT thing that we didn’t get to*)
- Add in more content, if you happen to have even more ideas
- Work on finalizing the physical crate and hosting materials online

Happy cr(e)ating!

DukeEngage 2026
