

Name: _____

Build Your Own Lighthouse!

In this activity, you will build your own model lighthouse, similar to the lighthouse on Cape Lookout, using simple craft materials. You will learn about the purpose of lighthouses, their importance to communities like Cape Lookout, and express your creativity through design!

Steps to Build Your Lighthouse:

1. **Wrap the Tower:** Wrap the paper roll in white construction paper. Use glue or tape to secure it.
2. **Design the Tower:** Decorate your lighthouse tower!
 - a. You can copy the black-and-white diamond pattern of Cape Lookout
 - b. OR make your own custom design- get creative!
3. **Make the Light Room:** Glue or tape a small paper cup or cone to the top of the roll. Tape a small **glow stick (or LED tea light)** inside — this is your lighthouse's beacon!
4. **Create the Base:** Glue the lighthouse onto the center of your paper plate.
5. **Decorate the Scene:** Use shells, pebbles, and coloring tools to design the land and sea around your lighthouse.
